

Renal® Combi

Complementary feed for dogs and cats

With calcium salts, sodium bicarbonate, chitosan, fructo-oligosaccharides, and olive extract

Short-chain **fructo-oligosaccharides** (Profeed®) Fiber compounds found in many plants, which produce beneficial short-chain fatty acids during digestion.

Vitamin C provides antioxidant protection.

Vitamins B12, B6 and **folic acid** are essential micronutrients for hemoglobin and red blood cell production.

Enterococcus faecium helps regulate gut flora and supports digestive function.

Calcium salts [calcium carbonate, calcium lacto-gluconate] bind phosphate from food to form

insoluble phosphate compounds, which are excreted through the intestines.

Chitosan is a polysaccharide derived from crustacean shells that supports the elimination of toxins via the intestines.

Sodium bicarbonate helps maintain the body's natural acid-base balance due to its buffering capacity.

The nutrients in **Renal® Combi** help support normal metabolic balance and antioxidant defense while maintaining a physiological equilibrium between intestinal absorption and renal excretion of phosphate and calcium. Additionally, **Renal® Combi** can promote proper protein metabolism and efficient nitrogen excretion by ensuring optimal intestinal function.

Composition:

Calcium carbonate 26%, fructo-oligosaccharides 20%, calcium salts of organic acids [calcium lactogluconate] 16%, maltodextrin, chitosan 8%, sodium bicarbonate 6%, sodium pyrophosphate, yeast and similar products, lupine protein meal.

Additives per kg:

Flavoring agents:

Olea europaea L. (Olive extract) 20,000 mg

Nutritional additives:

Vitamin C [3a300] 48,750 mg

Vitamin B₆ [3a831] 5,000 mg

Folic Acid [3a316] 2,000 mg

Vitamin B₁₂ 100 mg

Vitamin E [3a700] 18 I.E.

Gut flora stabilizers:

Enterococcus faecium DMS 10663 /

NCIMB 10415 [4b1707] 5,2 x 10¹¹ CFU

Technological additives:

Colloidal silicon dioxide [E551b] 5,000 mg

Analytical constituents: Crude protein 3.5%, crude fiber 1.0%, crude fat 1.0%, crude ash 35.0%, moisture 4.0%

Feeding recommendation:

For dogs and cats of all ages, sizes, and living conditions. Renal® Combi should be mixed into the food.

The following total daily amounts should be given according to the animal's body weight (BW) using the appropriate measuring spoon (0.6 g or 2.4 g):

1 small measuring spoon (0.6 g) per 2.5 kg BW

1 large measuring spoon (2.4 g) per 10 kg BW

The daily amount should be divided into 2 or 3 meals and administered for at least 30 days. If necessary, Renal® Combi can be given long-term or permanently.

For best results, mix Renal® Combi with wet food. If feeding dry food, slightly moisten it so the powder adheres and is fully consumed.

Storage instructions:

Close the container after use. Store below 25°C, protected from light and heat.

Shelf life: 24 months

Available sizes: 50 g and 150 g container
