

RodiCare® Appetite

Complementary feed for rabbits, guinea pigs, and small rodents

With calamus and ginger

RodiCare® Appetit supplements a low-herb diet with calamus, gentian, ginger, and wormwood, plus tasty flavorings (black pepper extract) to help stimulate appetite.

Loss of appetite in rabbits, guinea pigs, and small rodents should always be taken seriously. Because they have a fast metabolism, they can quickly slip into an energy deficit, which may negatively affect liver health. In addition, for guinea pigs and rabbits, going without food for just a few hours can lead to digestive upset with potentially serious consequences. Animals that aren't eating should therefore always be seen by a veterinarian so the cause of the appetite loss can be determined.

Composition:

Dextrose 15%, [calamus root, wormwood herb, gentian root, ginger], macerated 1.5% each, calamus root 0.1%, wormwood herb 0.1%, gentian root 0.05%

Analytical constituents:

Crude protein	0%
Crude fat	1.1%
Sodium	0.1%
Crude fiber	1%
Crude ash	0.4%
Moisture	86.1%

Additives per 1000 mL:

Flavorings:

Black pepper extract	0.4 mL
----------------------	--------

Feeding recommendation:

Mix into food or administer directly into the mouth.

Depending on body weight, 1–3 times daily:

Mouse, hamster:

0.05 mL

Rat:

0.1 mL

Guinea pig, dwarf rabbit:

0.2–0.3 mL

Rabbit:

0.4–0.6 mL

Recommended feeding period:

2–5 days.

Notes:

Also make sure fresh water and good-quality hay are always available.

Shake well before use!

After use, please rinse the syringe.

Store at no more than 25 °C and protect from light.

Use up after opening.

Shelf life: 24 months

Package size:

15 mL glass bottle with dosing syringe
