

RodiCare® basic

Feed supplement for rabbits and guinea pigs

A high **crude fibre** content is the foundation for maintaining the intestinal flora and promoting intestinal peristalsis.

Quickly available energy ensures the maintenance of the sensitive energy metabolism in the liver.

Vitamins and minerals prevent nutritional and disease-related deficiencies.

Fenugreek seeds, calamus root and curcuma stimulate the appetite and digestive functions.

Camomile leaves, peppermint, fennel and caraway seeds and liquorice supplement the diet with valuable secondary plant substances.

Incorrect feeding is the main cause of digestive disorders in guinea pigs and rabbits. Crude fibre deficiency in particular leads to a lack of dental abrasion and dysbiosis, which can result in diarrhoea, constipation and tympany. In addition, hardly any wild herbs that naturally stimulate digestion are added.

RodiCare® basic is a pellet food specially formulated for guinea pigs and rabbits. Its high crude fibre content encourages digestive activity and forms the nutritional basis for vital intestinal flora.

RodiCare® basic contains all essential vitamins and minerals. Its high vitamin C content guarantees adequate provision even for guinea pigs that are temporarily deprived of fresh food.

As well, **RodiCare® basic** supplements the mostly low-herb diet with a specially formulated herb mix, which encourages digestion and stimulates the appetite.

Composition:

Linseed meal extract 20.6%, oat bran 20%, grass meal 15%, dried apple pomace 14%, sunflower meal extract 6%, barley 5%, beet molasses 4%, lignocellulose (softwood) 2.5%, parsley 2%, pineapple powder 1%, mint 1%, caraway seeds 1%, red paprika 1%, sodium chloride 0.7%, linseed 0.5%, fenugreek seeds 0.5%, liquorice 0.5%, curcuma 0.5%, calamus root 0.5%, fennel seeds 0.5%, dried camomile flowers 0.5%

Analytical components:

Crude protein	15.9%	Calcium	0.7%
Crude fat	3.3%	Phosphorus	0.35%
Crude fibre	17%	Sodium	0.3%
Crude ash	7%		

Additives per kg:

Nutritional physiological additives: Vitamin A [3a672a] 7,000 I.U., vitamin D₃ [3a671] 500 I.U., vitamin E 110 mg, vitamin C 1,000 mg, iron as ferrous sulphate monohydrate [3b103] 40 mg, manganese as manganese(II) oxide [3b502] 50 mg, zinc as zinc oxide [3b603] 74 mg, copper as copper(II) sulphate, pentahydrate [3b405] 15 mg, selenium as sodium selenite [3b801] 0.3 mg, iodine as calcium iodate, anhydrous [3b202] 1.1 mg, molybdenum as sodium molybdenum [E7] 0.2 mg, cobalt as coated granulated cobalt(II) carbonate [3b304] 0.4 mg

Feeding recommendation:

Guinea pigs:

Adult pets receive approx. 30 g/day (1 ½ measuring spoons).

Dwarf rabbits:

Adult pets receive approx. 50 g/day (2 ½ measuring spoons).

The required feeding quantity can vary depending on the pet's species, weight, age and health.

The exact quantity should be agreed after observation or consultation with a vet.

Recommended period of use: At least 20 – 30 days.

RodiCare® basic can also be used long term as a supplement to good-quality hay and fresh food.

Notes: In addition, fresh water and good-quality hay should always be freely available. Any sudden change of food should be avoided!

Any additional fresh food offered should be as structured as possible and initially only given in very small quantities, which are gradually increased.

Store in a dry place and not above 25°C.

Durability: 24 months

Trading form: 1000 g can, 4 kg bucket, 25 kg bag
